Experience Mankiw

Principles of Economics, 6e
Principles of Economics quickly became a best seller after its introduction and continues to be the most widely used text in the world because a superb writer and economist understood that true learning is a collaborative effort and he created the right tools to make the process possible. N. Gregory Mankiw's *Principles of Economics* stresses the most important concepts without overwhelming students with an excess of detail—a formula widely imitated—but yet to be matched!

PAMPLIN COLLEGE of BUSINESS

Post-Doctoral BRIDGE to BUSINESS PROGRAM

May 31 – July 29, 2011
Virginia Tech • Blacksburg, Virginia

Demand for qualified faculty in U.S. business schools is increasingly outpacing supply. Our post-doctoral **Bridge to Business Program** prepares non-business doctorates for positions as academically qualified (AQ) faculty in finance, management and marketing. This highly interactive and rigorous, eight-week program is intended to help new and experienced Ph.D.'s bridge into business schools as tenure-track faculty.

If you have a doctorate in economics, psychology, sociology, or a related discipline, our AACSB*-approved program affords an opportunity to leverage your doctoral training to build your academic career.
